Currently, we are energy dependent... Nevertheless, we have the resources to self-supply and have energy security... What really happens? What prevent us to use and valorise our biomass to provide heating and DHW to public consumption?

LEGISLATION, BUREAUCRACY, LACK OF KNOWLEDGE AND RECOGNITION

ABANDONMENT OF FORESTRY ACTIVITY

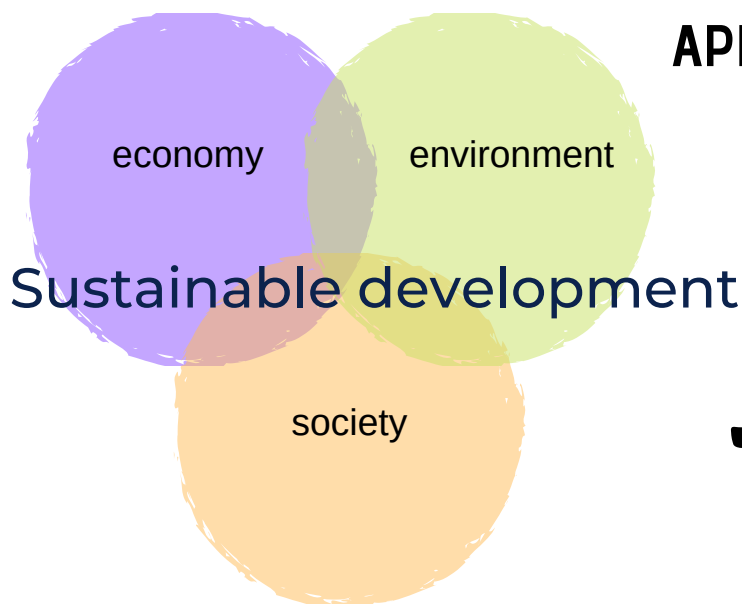

Therefore, without activity, without the management of our forests, how can we develop the value chain?

UNBLOCKING BARRIERS, proposing solutions and actions in a new regulatory framework, we have to take care of our forests and for that, we have to manage them

AWARENESS AND POLITICAL WILL

This reality is in the territory, where we live and this issue cannot be ignored or be secondary

APPLICATION OF THE PRINCIPLE OF SUBSIDIARITY IN THE FOREST MANAGEMENT

To fight against CLIMATE CHANGE DEPOPULATION

BIOECONOMY

MANAGEMENT =

Conservation + employment + less risk of forest fires

FORESTRY ACTIVITY = Low carbon economy and rural development
